CALL FOR SPONSORS
Nanjing, China, 22-25 May 2007
http://lamda.nju.edu.cn/conf/PAKDD07/

The premium international data mining event in the Asia-Pacific

The PAKDD conference series provides a unique forum for researchers and practitioners from academia, industry and government to share their knowledge and expertise in the field: it is an excellent venue for finding out the latest trends in academic and industrial research, and for exchanging information with other researchers in the field.

The PAKDD07 conference will be held in Nanjing, China, on 22-25 May 2007. This is a leading data mining conference, and it will attract distinguished academicians and industry people around the world. The conference proceedings are to be published in the Springer-Verlag "Lecture Notes in Computer Science" series.

In PAKDD07, the rich program of invited speakers, tutorials and satellite workshops, will help raise the scientific quality to a high level. Moreover, the reachability and attractiveness of Nanjing should also ensure exceptionally high attendance by academic, commercial and government participants (the past two editions had around 200 participants).

Expression of interest for sponsorship

PAKDD07 will provide its sponsors with great visibility within this Asia-Pacific and world-wide community. The conference Web site, continuously updated at http://lamda.nju.edu.cn/conf/PAKDD07/, will be from now on the reference point of this broad community: on the basis of previous experience we expect to receive several tens of thousands of contacts by the end of May 2007. Other promotion initiatives will be carried out, both nationwide and internationally, through our Web portals, mailing lists, posters and posting on specific media.

We, the organizers of the conference, wish to ask for your kind attention for the opportunity of becoming a distinguished PAKDD07 sponsor. Conference sponsorship enables your organization to reach the experts in industry and academia, and help distribute your products and exhibit your know-how. Your trademarks and names will be printed on the conference material and Web sites (see detailed arranged below). All sponsors will be invited to provide promotional material such as flyers and brochures for insertion into the delegates' conference kits. In addition, you will be investing in the future of data mining technology by supporting student travel and accommodation, student sessions, and other conference activities. Moreover we are open to in-kind sponsorships that directly reduce the costs of the conference organization, (for example conference bags, coffee breaks, dinner, welcome party), as well as any other personalized proposal.

Sponsorship opportunities

This is a unique opportunity for you to promote your organization, and to contribute to the data mining community in China and the world. We would like to present you with the opportunity to consider one of the following sponsorship arrangements.

Sponsor-A: 7,200 USD or 60,000 RMB
- Company logo and link on the conference website
